**Banyard Consultants work with value driven clients and building professionals who require consulting engineers that consistently deliver technical excellence.**

## Consultancy services

Our expert consultants deliver the design and consultancy solutions that our clients need, whilst remaining sensitive to the importance of capital, life-cycle costs and carbon emissions.

Banyards provide integrated management and a comprehensive range of consulting services to the construction industry ensuring projects meet the highest performance criteria and client deadlines.

We work in close partnership with architects, project managers and contractors to provide co-ordinated solutions, from site infrastructure to the integration of services critical to achieving a working environment that is comfortable, energy-efficient and cost-effective.

## Principal services

**Mechanical and electrical design**

**Engineering project management**

**Design validation**

**Validation surveys**

**Sustainable energy management**

**Condition and dilapidation surveys**

**Supervision and monitoring**

**Independent commissioning validation**

**Commissioning management**

**Hands-on commissioning**

**Web-based O&M manuals**

## Market-leading design and energy management

Our engineers are ACE affiliated, and our CIBSE accredited Low Carbon Energy Assessors are able to cater for the growing demand in sustainable energy management solutions (including EPC, DEC and AC Inspections). Through our Carbon Trust accredited consultants, we give the advice necessary for any business to identify potential cost savings and reduce their carbon footprint.

### Allen & Overy

Banyards are appointed by Allen & Overy to provide technical support, engineering consultancy and commissioning services for projects at their headquarters in London.

### Defra Estate

Banyards are providing technical support to Defra, ensuring that the voltage optimisation installations throughout the estate fulfil Defra's carbon reduction targets.

### St John's, Smith Square Concert Hall (Listed Building)

Banyards are refurbishing several key areas, including artists' changing accommodation, booking office and restaurant, installing a disabled lift and replacing boiler plant.

### Department of Energy and Climate Change (DECC)

Banyards were retained to design and supervise the fit out of 3-8 Whitehall Place. Our role included advising and implementing reductions in carbon emissions.
