

Are your energy bills costing your company more than they should ?

Banyard Consultants can help you:

- **Cut Carbon**
- **Reduce Energy Cost**
- **Increase Profitability**

Working with

Banyard Consultants works closely with the Carbon Trust to help companies take action on climate change. Reducing the amount of carbon you emit is one of the fastest, most effective ways to save your company money.

Banyard Consultants advise on, and assist with, the application for both the Carbon Trust's **FREE ON SITE SURVEY** and the Carbon Trust's **INTEREST FREE LOANS**. By identifying the most cost effective way for you to cut your emissions, we can develop a carbon management strategy and implementation plan that will deliver maximum benefit to both the environment and your company.

Free Carbon Trust Surveys

The Carbon Trust is currently offering a 1 or 2 day **free "carbon" survey** to qualifying businesses. To qualify, businesses, private and public sector, including schools and higher education, must have an energy spend of over £50,000 a year.

As Carbon Trust accredited assessors **Banyard Consultants** can apply and carry out the survey on your behalf.

Typically we will:

- Review your energy use
- Identify energy saving opportunities
- Define practical 'next steps'
- Assist with practical implementation support

Historically these surveys have identified 20% savings.

Interest Free Carbon Trust Loans

If you are an SME with less than 250 employees and a turnover of less than £40m, you could borrow between £3,000 and £100,000, interest free, over 1 to 4 years to install energy/carbon saving equipment.

Typical qualifying schemes are:

- Energy efficient lighting
- Heating and cooling controls
- Biomass boilers
- Renewables e.g. photovoltaic cells
- Voltage optimisation equipment

These loan repayments should be met by the energy savings. With our Carbon Trust accredited assessors **Banyard Consultants** can help you

Working with

Banyard
consultants

apply for the loan, design and project manage the installation.

What if I'm a Public Sector organisation?

No problem, the Carbon Trust also provide funding under the Salix Financial Scheme. Salix has public funding from the Carbon Trust to enable all public sector bodies including **universities, local authorities, NHS trusts** and **central government** to improve energy efficiency, attain emissions targets, reduce energy bills and raise green credentials.

Typical Salix projects include:

- Insulation
- Improved glazing
- Lighting and heating upgrades
- IT improvements
- Swimming pool covers
- Voltage reduction
- Boiler replacement

The Salix scheme offers a real financial opportunity to the public sector, delivering benefits in terms of cost savings, reduced environmental impact and enhanced reputation.

With our Carbon Trust accredited assessors **Banyard Consultants** can advise on suitable qualifying projects and help you apply for the **INTEREST FREE LOAN** programme. We can also develop a carbon management strategy and implementation plan, and design and project manage the installation.

What if I do not qualify?

Banyard Consultants can still help you save money on your energy bill. Most energy saving equipment qualifies for **enhanced capital allowances** and the Carbon Trust have other funding options for surveys which we can access on your behalf.
